

VERMONT WORKING LANDS ENTERPRISE INITIATIVE

DairyVision Vermont

DairyVision Vermont is a new technical service effort that grew from a farmer led desire for access to the best possible technical assistance for progressively minded commodity milk producers of all types. Empowering dairy farmers with the business skills to grow in an environmentally and fiscally sound manner will increase the confidence of dairy processors to invest in Vermont; creating jobs in milk production, processing, distribution and marketing.

This investment will fund a farmer –led technical service effort empowering farmers. A 17-member board, heavily populated by dairy farmers, created the structure for DairyVision, secured funds and hired staff for program implementation. Strong backing from private, state, and non-profit organizations confirms the program need. The service providers and staff are recognized for their years of quality service to dairy.

Total Working Lands Grant—\$50,000.00

Total Match provided by DairyVision—\$63,000.00
