

# NorthWoods Stewardship Center

East Charleston, VT

Working Lands funds will be used for a forwarding trailer and implementation of harvests in the Northeast Kingdom. Vermont Woodlands Association has partnered with NorthWoods in the past to offer educational programs, and will continue to be a key collaborator as demonstration harvests and related workshops develop. Through VWA, NorthWoods is also involved with the Tree Farm program in Vermont, a certification and management resource for landowners with too little acreage to enroll in Vermont's Use Value Appraisal (Current Use) program.
