

VERMONT WORKING LANDS ENTERPRISE INITIATIVE

Patricia A. Hannaford Regional Technical School District

Middlebury, VT

Patricia A.

Hannaford
 **Career
Center**

The mission of the Hannaford Career Center is to provide high quality technical, workplace and continuing educational opportunities for the secondary and adult learners of Addison County.

The majority of students come from Middlebury Union High School, Mount Abraham Union High School and Vergennes Union High School. We also have students from private schools, homeschooled students, and high schools in the outlying areas.

The Vermont Solid Waste District Managers Association looks to support a paradigm shift from waste to resource management. This project builds on the existing Close the Loop campaign to develop systems to recycle all of Vermont's food scraps by 2017. They will do this by providing compost site operators with comprehensive technical assistance from compost site development to business planning and management best practices. In doing so, they will support and enhance Vermont's working landscape, diversify farm revenues, increase local food production, provide low-cost chicken feed sources, and improve soil quality.

Total Working Lands Grant—\$55,000.00

Total Match provided by the Managers Association —\$30,000.00
