

VERMONT WORKING LANDS ENTERPRISE INITIATIVE

Winterwood Timber Frames, LLC

Waterbury, VT

Winterwood Timber Frames is a small, highly skilled group of people dedicated to being the premier timber frame company in Central Vermont. Great communication skills and attention to detail are among our greatest assets. They believe that their clients deserve to be listened to and cared for as they go through the many phases of a building project. You won't ever feel that your opinions are not being heard.

Winterwood Timber Frames specialize in traditional Vermont architecture where form and function go hand in hand, and every building is designed to fit naturally into their New England landscape. Paying homage to the skills of our early settlers, they incorporate many of their time-honored joinery techniques as they precisely cut and fit the massive pine timbers. Winterwood Timber Frames maintains strict tolerances in order to provide clients with the highest quality frames which are as beautiful as they are strong.

Funds will be used for infrastructure upgrades for a bioregional wood building-material product line, including two dehumidifying kilns, a three phase power grid, an outdoor wood-waste burning boiler system and signage for the showroom.

Total Working Lands Grant: \$75,000

Total Matching Funds: \$210,000
